

Cover Crops
Our Roots Run Deep

AUSTRIAN WINTER PEA

A quick-growing legume that can produce 90-150# N / acre, Austrian Winter Peas can be seeded with barley, oats, triticale and cereal rye for improved forage yields. In cover cropping, it can be used with Enricher Radish in alternating rows or broadcast/drilled in a mix containing Annual Ryegrass and Rape after a soy harvest. Austrian Winter Peas grow best in lower temperature, moist areas. It will likely winterkill when sustained temps are below 18°F if there is no snow cover.
