Our Roots Run Deep

TRITICALE

A cross between cereal rye and Durum wheat, Triticale is an annual similar in hardiness to cereal rye with both spring and winter varieties available. Triticale produces good biomass and will make forage for grazing, control erosion, build soil organic matter, and scavenge nutrients. A deep and fibrous root system makes Triticale a popular component in mixes that include Annual Ryegrass, Radish, Rapeseed, Oats, Peas, Vetches, and Clovers.

BENEFIT RATINGS	EROSION CONTROL	
	FORAGE QUALITY	
	NITROGEN SOURCE	
	NUTRIENT SCAVENGING	
	QUICK GROWTH	
	SOIL BUILDING	
	WEED SUPPRESSION	
	WINTER HARDINESS	
PLANTING INFO	SEEDING RATE LBS/A	DRILLED: 65 BROADCAST: 80 AERIAL: 95
	SEEDING DEPTH	0.5 - 1.0"
	MIN. GERM. TEMP	65 F
	INTERSEED	NO
	SEEDS/LB	23,000
